I T A L I A

Industrial and Civil Installations

Company Profile

TAINOX ITALIA S.r.l. is a company that operates in the construction field and the industrial technology systems and services.

The key points of strength of the Company are:

- **Construction and Monitoring**
- **Workshop Supplies**
- **Maintenance**
- **Designs & Planning**

The activities are carried out with the use of highly specialized resources in accordance to International standards in order to act in response to the many commitments of such significant magnitude. Furthermore, with complete and efficient equipment supply, TAINOX ITALIA S.r.l. is completely self-sufficient in its operations.

This characteristic is increasingly in demand and appreciated by our clients who find themselves resolved by those difficult decision-making situations which arise from the need to coordinate actions of various natures.

TAINOX ITALIA S.r.l. is fully equipped to autonomously carry out, technical assistance, wall constructions, electrical utilities, land movement, painting and storage activities.

Company Profile

Construction and Monitoring

TAINOX ITALIA S.r.l. carries out the construction and installation of civil and industrial systems, or parts of them such as piping, assemblies and structural activities.

The activities are aimed directly to our customers (industries, service companies, Manufacturers, Engineering companies, etc.), a systems and service company (design groups, installation companies, etc.) to both public and private enterprises.

The specialization is highly developed in all areas of stainless steel welding together with manual and automatic welding machines such as TIG orbital, in the framework of:

- Chemical-Pharmaceutical sites and Research institutes
- H.V.A.C. systems (heating, ventilation and air-conditioning)
- Fire protection systems
- Water and sanitation systems
- Sterile and Power systems
- Production cycles and process systems
- Pipelines, gas lines, water pipelines

Company Profile

Workshop Supplies

The Workshop expertise allows the prefabrication of piping, support-based constructions and systems parts.

Supplies are complete with all related documentation (plans, assembly parts/kits, test certificates, certificates of origin, etc.), packaging and all necessary equipment for the transportation measures within the country and abroad.

Maintenance

TAINOX ITALIA S.r.l supplies maintenance service for systems by contract or for intervention purposes.

The maintenance programs may be defined by the customer or in collaboration with our technical department.

Maintenance orders are dealt by our specialized staff who is exclusively dedicated to this activity in order to ensure the maximum efficiency concerning all operations.

Designs and Planning

Our technical department develops all the work related to the construction and assembly activities, workshop and maintenance activities, and is therefore able to provide the following services:

- Final design and construction
- Technical Specifications
- Verifications, inspections & testing and validations
- Realization of the technical documentation
